

Agile Development Support for Consumer Interface Projects

Do you need temporary help completing a development project? Venture Solutions has twenty years of experience helping clients meet their development timetables for consumer interface projects. Our expertise has delivered applications and online interfaces for warranty claims, product repair requests, credit monitoring, international support programs, and more.

We complement internal development groups to deliver market-ready consumer interface solutions on time and on budget.

Problem

Are your goals running ahead of what internal development resources can handle? That's a common issue these days across all businesses in all industries. You need expertise to meet your development goals without overshooting your budget goals.

Solution

Venture Solutions can thread that needle. We have an experienced staff of business analysts, developers, and UX professionals who can complement your internal development resources to hit crucial deadlines without the long-term budget implications. We know how to complement and accelerate your current staff, which allows everyone to win.

Services

What to Expect

We follow a standard engagement process to streamline development and optimize the final product, including steps to:

-  Understand your broader goals, projects, and timetables involved
-  Gather requirements
-  Offer a proposal with a business case
-  Assign support staff & identify communication strategy
-  Track the project
-  Complete testing and user acceptance
-  Post-launch assessment

Who We Are

Venture Solutions is a top-tier provider of CCM services for medium and large American companies. We offer services that cover the full pre-production and production workflow, as well as compliance reporting. Among these services is development of online applications and interfaces for consumer use.
