

NSite™

NSite™ puts you in total control of composition, document creation, approval workflows, and compliance reporting. Our automated technology provides the most flexible and efficient approach to meeting requirements for business communications. Also, NSite™'s comprehensive business rules layer, independent of any vendor-specific composition platform, eliminates the constraints and dependencies of supporting multiple solutions.

Integrated Communications

Our solution is a secure technology framework, leveraging a broad suite of best-in-class tools. Our clients experience a completely integrated and easy-to-use environment. Through a combination of a configurable platform, evergreen technologies, user-friendly interface, and deep industry expertise, NSite™ from Venture Solutions offers unparalleled capabilities. Our clients receive the benefits of a completely visible production environment while maintaining strategic control of critical processes and content.

NSite™ Features

Command & Control

Self-Service Technology

Data Integration

Preference Management

Evergreen Technology

Real time welcome emails see **10X** more transaction rates and revenue per email over batched mailings.

Keeping You Secure

Our clients are constantly challenged to attract new customers while also supporting ever-changing federal and industry guidelines around privacy concerns. Delivering the highest quality product and service in a regulated, cost-conscious, and competitive market is a key priority for all organizations. NSite™ can help you overcome these challenges with:

- Secure & Redundant Data Centers
- Defined Business Continuity Plan
- Data Center Failover
- PCI & HIPAA Compliant Processes
- SSAE18 SOC2 Certified
- Role-Based User Access
- Platform Content Change Tracking
